

Cyber Law in a Nutshell

(A Two day Workshop)

About the Course

This course introduces the major elements and dimensions of Cyber Law applicable to Indian Scenario with international perspective in view. Any organization / individual are liable to prosecution by cyber cop at any point of time even without committing any intentional crime. This could potentially be due to any inadvertent employee demeanour as well.

You cannot safeguard yourself if you don't have adequate knowledge of the applicable laws that need to be adhered to and those that are liable to get violated. This knowledge is mandatory for the people who are using computer and Internet and is equally important for the organization. Any software and application developer can also be benefited by gaining knowledge of cyber law fundamentals.

Workshop objectives

At the end of this course, participants will be able to:
